WHY YOU SHOULD BUY THE LENOVO IDEACENTRE GAMING 5 (17L, 7)

The fastest in the game*

AMD Ryzen™ 5000 Series processors power the next generation of demanding games, providing one-of-a-kind immersive experiences and dominating any multithreaded task like 3D and video rendering, and software compiling.

The ultimate play

NVIDIA® GeForce RTX™ 30 Series GPUs deliver the ultimate performance for gamers and creators. They're powered by Ampere - NVIDIA's 2nd generation RTX architecture - with new RT Cores, Tensor Cores, and streaming multiprocessors for the most realistic ray-traced graphics and cutting-edge AI features.

Chillier by 5 degrees. Speedier by multiple degrees.

Keep cooler, faster, and quieter even as your gaming or video rendering sessions reach a fever pitch with a generous 65W CPU cooler and generational improvements in wattage and 50% better airflow. This means that your whole system is now 5° Celsius cooler. And switch gears to favor either speed, battery life, or acoustics with Fn+Q.

Cool, streamlined aesthetics

Your desktop should serve as the artistic focal point of any room, home office, or battlestation hub. Rimmed with sports blue lighting along the front bezels and a clean and stylish set of teal-accented 3D and 2D lined patterns along the front to ventilate and chill your system, IdeaCentre Gaming 5's minimalist design and airy 17L chassis make you feel and look cool all at once.
