

BUSINESS DEVICES THAT ARE A CLASS APART

ThinkBook combines the style and user experience of consumer devices with the security and business-class support of ThinkPad.

ThinkBook 14s IWL

Smarter
technology
for all

Lenovo

Designed for young professionals who want well-designed technology, the sleek metal body has sharp lines and an appealing mineral gray color, making it look more like a premium consumer laptop. Productivity innovations include a fingerprint sensor in place of a power button, to instantly switch on the device and authenticate users at the same time, along with dedicated Skype hot keys making it easier to multitask applications and handle VOIP calls.

REASONS TO BUY

The ultra-narrow frame around the 14" display ensures more screen real estate in a smaller footprint, reducing the size and weight of the device. Dolby® Premium Audio™ and HARMAN speakers produce high-fidelity sound for presentations, videos and music. Plus there's up to 10 hours of battery life for mobile travelers.

An onboard TPM chip encrypts sensitive data, while businesses can access the same premium support services and warranties as the Lenovo ThinkPad range.

Minimal preloaded applications mean maximum battery life and responsiveness for users, and faster deployment for IT admins.
